Experience

2019-2020 : Web Developer at EandM Electric & Machinery

At EandM, I used the ASP.NET web framework alongside MS SQL Server in order to provide company salespeople a performant and dynamic web-based tool to drive sales. My goal was to minimize the time company personnel spend on searching and organizing their supplier and customer data, so that they could maximize their time spent helping and talking with their customers.

Spring & Summer 2018: Intern at ARS

At American Recovery Services, I created a new piece of software which reconciled ARS's database records with one of their business partners while reporting its actions through a custom GUI interface on a daily cycle. For this project I used the .NET framework, postgresSQL, and their partner's RESTful API.

Fall & Winter 2017: Technical Support Specialist at VoxPro (Nest contract)

Right after I graduated in the summer of 2017, I got a job working in technical support for the Alphabet subsidiary specializing in home automation, Nest. I was part of the HVAC support team who answered customer questions and concerns as well as performed over the phone installations. This gave me valuable experience in effective communication of technical concepts as well as troubleshooting customer issues over the phone.

Tech Stacks

- React , Node.js, postgresSQL, AWS, Debian Linux, git, Visual Studio Code/Vim
 - ASP.NET, .NET Core, Microsoft SQL Server, TFS, Visual Studio
-

Languages

- Javascript/ES6/Typescript, SQL, HTML5/CSS, C#, Python, GDScript
-

Education

- University of California: Davis
- Bachelor of Sciences in Computer Science, Class of 2017
- GPA: 3.0
